Deadline for manuscript submissions:

closed (27 December 2024)

Message from the Guest Editors

Experiences and practices of Community Based Urban Agriculture (CBUA) are increasingly central in the current debate on food system transition, linking food provision with an empowered role of local society and citizens coalitions in place stewardship, access to resources and the promotion of fair regulations in the use of commons. This SI aims at shedding light on how CBUA practices question the current socio-economic and spatial governance systems, fostering place awareness and mutuality in local social relationships.

- CBUA and related social innovations as a pivotal component of innovative civic welfare systems and of resilient and place based urban economy.
- CBUA as a part of an innovative agro-ecological approach in urban planning suitable to offset, urban, rural and ecological needs based on inhabitants willingness.
- CBUA as a social innovation fostering citizens and proactive groups' place-awareness and stewardship.
- Social Return on Investment analysis of CBUA experiences.
- New policy measures and methods to scale-up CBUAs at the urban-bioregion level.
- Political economy of CBUA development and upscale at the urban system governance level.

land

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
