Amazonia's Socioecological Complexity: A Microcosm of the Challenges and Opportunities in Reconciling Development and Conservation

Guest Editors:

Dr. Paulo Eduardo dos Santos Massoca

Center for the Analysis of Social-Ecological Landscapes (CASEL), Indiana University Bloomington, Bloomington, IN 47405, USA

Dr. João Vítor Campos-Silva

Faculty of Environmental Sciences and Natural Resource Management, Norwegian University of Life Sciences, 1430 Ås, Norway

Dr. Rita Mesquita

Instituto Nacional de Pesquisas da Amazônia (INPA), Manaus 69011-970, AM, Brazil

Deadline for manuscript submissions:

closed (23 March 2022)

Message from the Guest Editors

Amazonia harbors some of the world's most biodiverse ecosystems and is home to over 30 million people in nine countries and diverse local conditions, urban and rural. A region of continental proportions, Amazonia is better characterized as a mosaic of sociocultural and environmental realities and interconnected local and global economies. As such, the Amazon is the stage where diverse worldviews, demands, initiatives, and narratives regarding conservation and development intersect, impacting socioecological systems from local to global scales.

As a microcosm of the complex and rapid changes of the Anthropocene, Amazonia offers a window of opportunity for understanding the challenges and potential pathways in tackling the critical socioenvironmental demands of our times. In this Special Issue, we aim to collect research studies that frame and analyze the rich, complex, and dynamic interactions unfolding in Amazonia's socioecological systems from diverse angles and with theoretical and methodological research traditions.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
