Interdisciplinary Center for Archaeology and Evolution of Human Behaviour (ICArEHB), Universidade do Algarve, 8005-139 Faro, Portugal

Deadline for manuscript submissions:

closed (31 March 2023)

Message from the Guest Editors

We welcome papers that address the archaeological investigation of South American landscapes, and on how the archaeological view can inform present day landscape use and management. Notably, we welcome contributions that:

1. Test existing narratives around historic land use
2. Provide evidence for land use change and resource use in the past, and their related socioecological implications
3. Develop methods for multidisciplinary analysis of landscape evolution and resilience—origin, change, thresholds, tipping points, abandonment
4. Provide data to test models of long-term change and bring about progress in understanding the links between local, regional, and global patterns and drivers, including political ecology perspectives
5. Deliver transdisciplinary and multi-sector views of landscape management sustainability
6. Study how social relations and cultural values shaped past and present perceptions of landscape

Problem-oriented, interdisciplinary, and diachronic contributions on these themes and their links to landscape governance and participatory approaches are particularly welcome as well as works with a policy dimension regarding specific regions or continental overviews.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
