- 2. Department of Archaeology, Forensics, Geography, and Anthropology, School of Social Sciences, University of Western Australia, Perth, WA 6009, Australia

Deadline for manuscript submissions:

closed (28 July 2023)

Message from the Guest Editor

In this Special Issue, we invite papers focusing on, but not limited to, the following topics:

- Understanding how climate change is currently affecting ecosystems, and how it is projected to do so in the future:
- Consideration of how management and ecological restoration may need to change to more effectively deal with climate change and other drivers of biodiversity loss;
- Evaluations of climate change and/or biodiversity policy and governance;
- Studies of governance or management effectiveness in these policy areas, particularly with respect to their influence on ecological, social, and economic outcomes:
- Methods for targeting drivers of biodiversity loss in complex social-ecological systems;
- Insights into the management of ecosystems that are characterised as novel, hybrid, or heavily modified by humans (including urban ecosystems);
- Analysis of nature-based solutions or other innovative tools for integrating biodiversity and climate change adaptation into land-use planning.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
