### **Message from the Guest Editors**

The goal of this Special Issue is to collect papers (original research articles and review papers) to provide insights into drought monitoring, soil and water conservation and hydrological connectivity.

We welcome papers on the following topics:

- Advanced methods for monitoring different types and characteristics of drought;
- Effects of drought occurrence on soil functions under different land uses;
- Impact of drought on hydrological connectivity within watersheds;
- Drought mitigation measures for improving soil water regimes;
- Interrelations of drought, soil hydraulic properties, and land cover;
- Drought and water supply in urban areas and industrial regions.

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
