Land Resource Assessment

Guest Editors:

Dr. Weiguo Fan

Department of Economics and Management, North China Electric Power University, Baoding 071003, China

Dr. Xuechao Wang

Faculty of Geographical Science, Beijing Normal University, Beijing 100875, China

Dr. Ranjay K. Singh

ICAR-Central Soil Salinity Research Institute, Karnal 132001, Haryana, India

Deadline for manuscript submissions:
closed (7 February 2025)

Message from the Guest Editors

As an important natural resource, land resource integrates natural and human elements, and is the core of production, life, and ecological activities. Land resource is non-renewable and scarce, which determines that land resource assessment has a far-reaching impact on high-quality development. From an international perspective, the Future Earth program integrates research projects such as the global land program and ecosystem services, making land science a key component of the Future Earth program, reflecting the close relationship between human and natural elements. We welcome original and review articles on topics such as land resource efficiency research for high-quality development, the whole process of land resource research and future scenario simulation based on Energy System Language, LCA and energy, land resource capitalization, urban and rural land resource functional differences evaluation, land transfer analysis, land resource ecological security, and land carrying capacity evaluation.

Department Sustainable
Landscape Development,
Institute for Geosciences and
Geography, University of Halle,
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
