Deadline for manuscript submissions:

closed (31 July 2022)

Message from the Guest Editor

Dear Colleagues,

This Special Issue, Feature Paper for Soil-Sediment-Water Systems Section, of *Land* is inviting papers and opinions on the topics related to the management of the soil-sediment-water systems, in natural as well as agricultural systems. Specifically, we are looking for manuscripts on the following topics:

- Sustainable land and water management
- Land restoration
- Nutrient cycling in land management

Manuscripts can be theoretical, applied, 'state of the science' reviews, and opinion papers. Interdisciplinary manuscripts are particularly welcome, as the soil-sediment-water system lies at the basis of all societal challenges of our time.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
