## Hydrological Processes in Urban Environments

Guest Editors:

**Dr. Tsung-Yu Lee**

**Dr. Chia-Jeng Chen**

**Dr. Yin-Phan Tsang**

**Dr. Shao-Yiu Hsu**

Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### Message from the Guest Editors

Present and future challenges posed by climate change and the growth of the number of people living in urban areas lead to the need to find new ways to manage the development of cities, in order to mitigate not only floods, but also threats such as water supply security, pollution, etc.

This Special Issue has two objectives: improving the knowledge of hydrological processes in urbanized areas and contributing to the development of new methods, strategies and technologies for the management of urban waters.

Urban catchments are characterized by a flashier nature of the hydrological response compared to natural catchments. In addition, the heterogeneity of land uses and underground characteristics influences the processes in the water cycle. Smart cities using water in smart ways will influence the water cycle as well. Moreover, water quality issues also have crucial importance. Nature-based solutions are applied to remove pollutants. All of these interactions between water processes and the various elements of urban catchments constitute many research directions, which deserve to be studied in a more in-depth manner.

## Editor-in-Chief

### Prof. Dr. Christine Fürst

Institute for Geosciences and  
Geography, Department  
Sustainable Landscape  
Development, University of Halle,  
Von-Seckendorff-Platz 4, 06120  
Halle, Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
