Message from the Guest Editors

Land use transition is a manifestation of land use and land cover change (LUCC) and also a major research focus of the Global Land Project (GLP) as well as land system science (LSS). Land use transitions can be seen as primary forces driving the transformation of the rural–urban territorial system and bring about direct socio-economic and environmental effects on regional sustainability and cause regional socio-economic and spatial restructuring. Land use transitions can be measured by changes in both the dominant morphology (e.g., quantity, structure, and spatial pattern) and recessive morphology (e.g., quality, property rights, management mode, fixed input, productive ability, and function) of land use.

We invite papers that detect or examine the process, pattern, and socio-economic and environmental effects of land use transitions and the mechanism of human–land interactions in the context of rapid urbanization and industrialization from a wide range of perspectives and provide solutions for sustainable land use based on scientific findings.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
