Message from the Guest Editors

This Special Issue focuses on the actual and potential roles of landscape perspectives in the transformation of urban landscapes. Using landscape architecture and landscape studies as lenses fosters trans-scalar and transdisciplinary perspectives that are beneficial for the sustainable transition of our urban environments. The Issue will highlight neither formalistic or disciplinary routines nor specifically urban greening or green structures, which are both often written about in association with landscape architecture, but rather amplify everyday landscapes as human habitats, beyond questions of land ownership and managerial functions.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
