New Advance in Landscape Patterns in Urban–Rural Interfaces

Guest Editors:

Dr. Miguel Ángel Mejías Vera

Department: Geografía e Historia,
Universidad de la Laguna, San
Cristobal de La Laguna, Spain

Prof. Dr. Alessandra Battisti

Department of Planning, Design,
and Technology of Architecture,
Sapienza, University of Rome, Via
Flaminia 72, 00196 Rome, Italy

Deadline for manuscript
submissions:

closed (31 May 2024)

Message from the Guest Editors

The urban–rural interface landscape is a finite, fuzzy-edged, complex, fragmented and heterogeneous space, distributed between the compact city boundary and the natural edges or limits. It is the territory with the greatest spatial dynamics, where the processes of change are materialised; it is the space that supports the tension between a growing and expansive cell that represents the urban and its dispersion, against the retaining wall of the natural space, generally with some degree of protection. This double tension at both edges can be the spatial framework for reflection in this Special Issue.

The objectives of this Special Issue focus on the following:

- Detecting patterns of landscape problems at the urban–rural interface.
- The proposal of new methodologies to analyse and sequence patterns of landscape change at the urban–rural interface.
- To present new proposals and strategies on territorial and landscape planning at the urban–rural interface.
- To value landscape studies that focus on the urban–rural interface of island spaces.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and
Geography, Department
Sustainable Landscape
Development, University of Halle,
Von-Seckendorff-Platz 4, 06120
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
