Deadline for manuscript  
submissions:

**closed (30 November 2020)**

### Message from the Guest Editors

Urbanization, growth population and climate change have negative impacts on ecosystem services (ES) in cities. Assessing as well as estimating the losses of ES due to rapid urban expansion plays a significant role in sustainable urban development. However, studies on the effects of urbanization on ES have shown inconsistent and, in some cases, contradictory results.

Modern compact cities have been identified as having a high-density and mixed-use pattern. Their features are believed to contribute to a form of functional urban design that supports sustainability and restresses the importance of ES. The urban green space plays a vital role in the design and impact on how compact cities have developed, and thus, a scientific discord on the amount of greenery individuals require and to what extent contemporary approaches address this has been triggered. Therefore, future cities should integrate social-ecological systems into urban planning, management, and governance. Topics related to compact city design and land use planning are welcome.

This SI aims to explore innovative approaches for enhancing urban sustainability and ES in the face of increasing urbanization concerns.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Christine Fürst

Institute for Geosciences and  
Geography, Dept. Sustainable  
Landscape Development,  
University of Halle, Von-  
Seckendorff-Platz 4, 06120 Halle  
(Saale), Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), AGRICOLA, AGRIS, GeoRef, RePEc, and many other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
