### Message from the Guest Editors

The purpose of this special volume of *Land* is to present new data and deepen the discussion of the connection between protected areas, and therefore of the related habitats present. In particular, we want to address the issue of the importance, through different points of view, of these environmental conservation operations, as indispensable and lasting means for the conservation of animal communities, with particular reference to all vertebrates, including large mammals. The aspect of the management of these ecological connection areas should also be a topic of discussion in this Special Issue, with particular reference to the involvement of the human populations that inhabit the areas subject to conservation, planning and management.

Deadline for manuscript submissions:

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
