Message from the Guest Editors

Dear Colleagues,

Land use affects essential resources within the ecosystem. Among different ecosystem resources, soil has prime importance. Poor agricultural land management gradually destroys large agricultural land areas. It is also posing a severe threat to rural agriculture in many developing countries. This Special Issue will cover all possible consequences of different land-use and remediation procedures, such as soil nutrients pool, plant nutrition, and agricultural improvements, but are not limited to these. Potential topics include, but are not limited to:

- Soil properties interaction with agricultural pollutants under agricultural land use;
- Agricultural land use impacts on soil microenvironment and microbial diversity;
- Impact of agricultural land uses on irrigation water quality;
- Effect of land use on soil spatial variability.

Deadline for manuscript submissions:

30 April 2022

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), AGRICOLA, AGRIS, GeoRef, RePEc, and many other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
