Message from the Guest Editors

Dear Colleagues,

This Special Issue is intended to provide an understanding of influences of climate change on land uses and values, including the techniques that can be used to assess those influences as well as the key policy tools related to land development and investment strategies that can effectively and efficiently help the most vulnerable communities from the impact of climate change.

We, therefore, invite contributions covering, for example, the following topics:

- Lessons learned from different countries showing the best and/or bad practices of land management and development and their linkage to climate change;
- Innovative approaches for land management and development strategies to support climate change adaptation;
- New tools and technologies to support multi-stakeholder planning and/or collaborative management approach in land management and development processes to support climate change adaptation.

Seckendorff-Platz 4, 06120 Halle
(Saale), Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), AGRICOLA, AGRIS, GeoRef, RePEc, and many other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
