closed (31 January 2021)

Message from the Guest Editors

The administration of land tenure, value, and use is undergoing a new wave of technological innovation. The maturation and scaled implementation of crowdsourced data capture techniques, imagery-based mapping approaches, and cloud storage options are all adding to the expanded land administration toolbox.The challenge remains to better harness technological advancement to better support fair and responsible relationships between people and land.

This Special Issue focuses on how innovative approaches to land tenure, land value, and land use planning can directly contribute, both positively and negatively, to these societal issues at local, national, and global levels.

We invite papers that link innovative technologies in the areas of land tenure administration, land value modeling, and land use planning to specific societal problems such as climate change, land tenure insecurity, gender access to land, rapid urbanization, food security, and poverty reduction.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
