Message from the Guest Editor

Land (and its resources) is the most influential factor for development in the Global South. Youths, men, and women (and their households) rely upon it for their livelihoods, and to maintain their living conditions in both urban and rural areas. However, women and youths remain left behind in the effort to secure land rights for all. Developing tools or methods to secure land rights for all, especially for the youth and women, is a primary objective of responsible land management. Understanding the challenges women and youths face (and resolving these challenges) in their quest to access (or use and secure land resources) is vital for knowledge building to achieve tenure security for all. However, a broad knowledge gap exists in the land–women–youth–policy nexus of land management. This Special Issue builds a knowledge base of research that presents emerging land tools or methods that can improve the understanding of land–women–youth–policy relationships.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
