### Message from the Guest Editors

Dear Colleagues,

This Special Issue will comprise a selection of papers reporting recent advances on approaches to integrate concerns with disturbance agents (e.g., pests, diseases, wildfires and wind and snowstorms) in forest ecosystem management planning. The Special Issue aims to contribute to our understanding of disturbance agents and how they can be addressed in management planning and the assessment of ecosystem services. In this context, we welcome manuscripts that address challenges regarding:

- (a) the characterization of disturbance regimes;
- (b) the ecology and management of disturbance agents;
- (c) the assessment of the impacts of disturbances on the provision of ecosystem services;
- (d) the integration of concerns with disturbance agents in management planning;
- (e) the development of regulatory frameworks and policy analysis to address concerns about the impact of disturbance agents on forested landscapes.

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
