Message from the Guest Editors

Dear Colleagues,

Montane forests and alpine ecosystems are rich in biodiversity and endemism as well as being a large global carbon store. They are highly threatened by climate change, population growth and land use change. Mountains provide an ideal natural laboratory to investigate the evolution of social–ecological systems, and to assess the current challenges and opportunities that this past evolution has created. Mountains have been centres of past development and conduits for the spread of crops, populations and technologies. They were and remain a locus for cultural interaction, as manifested recently in many parts of the world at the local level through pastoral–agricultural–urban interactions over access to space and resources, particularly water. The relevance and impact of this Special Issue on mountains goes beyond academia, as practitioners and policy-makers need key information on the dynamics and changes in threatened ecosystems to help design and implement appropriate management strategies for sustainable mountain futures.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Dept. Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle (Saale), Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), AGRICOLA, AGRIS, GeoRef, RePEc, and many other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
