Deadline for manuscript
submissions:

30 September 2021

Message from the Guest Editors

It is well acknowledged how important green spaces are for the provision of various environmental services, as well as social and psychological benefits. In 2020, the pandemic generated by the novel Coronavirus led governments to impose restrictive measures to contain its spread and reduce its dramatic effects on hospitalizations and deaths. Urban green spaces represent opportunities to relax and lower the anxiety, but their accessibility is not always good. During the pandemic lockdown, green spaces considered gathering places were closed in some countries, while in other countries it was demonstrated that an urban green space could become an "oasis" for a moment of respite from home confinement. The aim of this Special Issue is to collect studies on the access and perception of green spaces (urban and non-urban) and the natural landscape in general during the time of pandemic, in order to provide governance actors with scientific evidence on which they can base policies for facing and coexisting with dramatic situations such as a pandemic—and for increasing the long-term resilience of the urban and rural landscape.

Seckendorff-Platz 4, 06120 Halle
(Saale), Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), AGRICOLA, AGRIS, GeoRef, RePEc, and many other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
