Deadline for manuscript  
submissions:

**closed (15 August 2022)**

### Message from the Guest Editors

Rangelands, covering up to a third of the earth's ice-free surface, provide livelihoods and food security for 800 million people, as well as critical habitat for wildlife. If sustainably managed as coupled human–natural systems, rangelands provide win-wins for people and nature, balancing human well-being and wildlife conservation...

We invite papers for a Special Issue to showcase evidence of coupled social and environmental benefits from innovative management in rangelands and tested strategies for making a transition to regenerative approaches. This Special Issue seeks to move beyond theory and anecdotes toward evidence for sustainable rangeland management, in terms of what works and why. We welcome field-based experiments testing mechanisms or enabling conditions for sustainable or regenerative systems, case studies showcasing ecological and/or social outcomes of novel policy, incentive structures or other catalysts for systems change, or socio-ecological modeling testing new hypotheses or providing new techniques for monitoring and managing for sustainability.

## Editor-in-Chief

### **Prof. Dr. Christine Fürst**

Institute for Geosciences and  
Geography, Department  
Sustainable Landscape  
Development, University of Halle,  
Von-Seckendorff-Platz 4, 06120  
Halle, Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
