Remote Sensing Analysis of Agricultural Landscapes

Guest Editors:

Prof. Dr. Anders Wästfelt

Department of human
geography, Stockholm University,
114 19 Stockholm, Sweden

Prof. Dr. Alejandro Rescia

Department of Biodiversity,
Ecology and Evolution,
Complutense University Madrid,
28040 Madrid, Spain

Prof. Dr. Samir Sayadi Gmada

Department of Agri-Food Chain
Economics, Institute of
Agricultural Research and
Training (IFAPA), 18080 Granada,
Spain

Message from the Guest Editors

Agricultural landscapes all over the world are vital for food provisioning, but they are also a representation of natural and cultural heritage. In contemporary times, the globalization of economies and climate change are inducing strong pressure to adapt to new circumstances and agricultural landscapes are changing rapidly everywhere. Remote sensing has been used for the analysis of agriculture productivity and precision farming, and, more seldom, for landscape analysis, but the potential for further development is huge. This Special Issue invites all kinds of remote landscape studies, which combine agricultural studies and landscape analysis with the use of remote sensed data. Both quantitative and qualitative studies are welcomed.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and
Geography, Department
Sustainable Landscape
Development, University of Halle,
Von-Seckendorff-Platz 4, 06120
Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
