### Message from the Guest Editors

Rural landscape dynamics are challenging existing policy regimes and new approaches to landscape governance regimes are called for. The underlying driving forces for landscape change are increasingly interlinked and globalized. Policy regimes are functioning at multiple levels across sectors. Some domains have been de-regulated, such as agricultural policies; others have expanded, such as nature conservation and natural resource policies; and others, again, have been decentralized, such as land-use planning—all adding to the complexity of change and regulation. Finally, rural communities themselves have changed because of various combinations of in and out migrations, and often find themselves locked in between influence from outside forces and internal social and cultural segregation.

Deadline for manuscript  
submissions:

**15 April 2020**

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Andrew Millington

College of Science and Engineering, Flinders University, GPO Box 2100, Adelaide, SA 5001, Australia

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** Indexed in the Social Sciences Citation Index (SSCI - Web of Science) and Scopus.

**CiteScore** (2018 Scopus data): 2.15, which equals rank 37/140 (Q2) in the category 'Nature and Landscape Conservation' and 90/336 (Q2) in 'Ecology'.
