Design, Department of Aerospace
and Geodesy, Technical
University of Munich (TUM),
Arcisstrasse 21, 80333 München,
Germany

Deadline for manuscript
submissions:

closed (28 February 2023)

Message from the Guest Editors

We are pleased to announce the Special Issue of Land on “Sustainable Land Management and Land Tenure: Experiences for the Future II”. As land management policies prepare and assess interventions into land use, size, shapes, rights, tenure, and values, the purpose of this Special Issue is to invite academics and practitioners to describe their practical experiences and insights in this field. The aim is to share proposals that deal with managing the built environment, developing infrastructures, and using natural and human resources to develop creative, innovative, and sustainable solutions. Potential topics include, but are not limited to:

capacity development in land management and land tenure;
experiences and best practices from land management projects from around the world;
policies for making land management practices responsible and sustainable;
strategies for sustainability in land planning processes;
challenging and/or successful land governance approaches;
evaluation methods and results to support land policy improvements; and
innovative land management tools.

Halle, Germany

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
