

## Urban Ecosystem Disservices across Heterogeneous Urban Landscapes

Guest Editors:

**Prof. Dr. Charlie Shackleton**

**Prof. Dr. Dagmar Haase**

**Dr. Lara Roman**

**Dr. Peer von Döhren**

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

Building on the influential works on ecosystem disservices generally, and urban ecosystem services in particular, this Special Issue seeks to bring together perspectives and empirical studies across heterogeneous urban landscapes around the globe. Specifically, we seek contributions on urban ecosystem disservices that provide a (i) more current understanding from a broad array of geographies, and (ii) integration of concepts and framings. Theoretical, conceptual opinion, review and empirical contributions are encouraged from established and early-career researchers from across and between the health, social, economic, natural, and inter- and transdisciplinary sciences. Whilst framing of ecosystem disservices is required of the papers to be published in this Special Issue, we welcome contributions from fields that have historically examined the harms that environmental processes and phenomena have been dealt in certain regions or communities, but that have not traditionally been termed ecosystem disservices. We also welcome submissions focusing on a variety of taxa and greenspaces.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
