Deadline for manuscript
submissions:

closed (30 September 2022)

Message from the Guest Editors

This Special Issue aims at collecting theoretical models as well as empirical studies concerning progress in urban green planning and monitoring. In particular, contributions on the following themes are welcome, though other relevant topics and reviews regarding urban forests will also be considered:

- Multi-disciplinary planning of urban and suburban green infrastructure;
- Combined environmental, societal, and economic challenges;
- Landscape ecological connectivity;
- Biodiversity conservation;
- Flows of service and disservices at multiple scales and in different geographic contexts;
- Resilience of cities against habitat and climate changes;
- Multi-temporal monitoring of ecosystem conditions;
- Long-term versus short-term balance between benefits and damages.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
