Message from the Guest Editors

Dear Colleagues,

Fires are essential to human life and civilization. Fires have been used by humans for millennia to promote agriculture and wildlife, and they have significant impacts on human health, atmospheric chemistry, and a multitude of ecosystems goods and services. To this day, wildland fires are events of social and ecological concern. Under climate change, wildfires are expected to increase in frequency, size, and intensity in many parts of the world. Equally the use of prescribed fires and other stand management approaches are widely considered to mitigate the impacts of future unplanned fires.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
