

Special Issue

Optimisation of Environmental, Economic and Social Impacts in Natural Resource Management

Message from the Guest Editor

The concept of the integrated management of natural resources is essential for balanced development in vulnerable areas. This Special Issue aims to present various approaches and methodologies that enable the evaluation of the effects of various environmental, economic and social measures in search of their optimisation in order to achieve the most equitable distribution of burdens and successes of various sectors in the transition to a society that makes sustainable use of natural resources.

- Socio-economic natural resources management;
- The governance and policy of natural resources;
- Sustainable development goals;
- The ecosystem services of natural resources;
- Relationships between environmental, social and economic opportunities and needs;
- The pollution of natural resources;
- The overexploitation of natural resources;
- Natural resources and conflicts in society;
- Examples of sustainable natural resources management.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
