

Special Issue

Recent Progress in Urbanisation Dynamics Research

Message from the Guest Editors

This Special Issue is dedicated to urbanization, which is observed every day, as well as the methods and techniques of monitoring and analyzing this phenomenon. In the 21st century, urbanization has gained momentum, and the awareness of the significance and influence of this phenomenon on our lives make us take a closer look at it not only with curiosity, but also great attention. The urbanization–and relation seems obvious, but is also interesting and multi-layered. The development of science and technology provides a lot of new tools for observing urbanization as well as the analyses and inference of the phenomenon in space. In the presented Special Issue, we would like to include manuscripts that present the latest trends of research that use experience in the widely-understood geography of the area. Contributions dealing with various aspects of in urbanization dynamics processes underway throughout the world are desired, including, but not limited to the following: spatial changes in city structures; the challenges of infrastructure provision; the loss of agricultural land; creating new spatial forms; and environmental, economic, and social changes.

Guest Editors

Prof. Dr. Iwona Cieślak

Prof. Dr. Andrzej Biłozor

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
