

Special Issue

The Role of Land Law in Urban Planning and Urban Development Process

Message from the Guest Editor

The Special Issue will expand these concerns by bringing in legal and regulatory aspects applying at national, regional and local levels of governance. It will also look at the applicability of different land management approaches, international comparative studies, urban density measurement, land-based financial mechanisms for capturing increased value from urban development, and the effectiveness of planning regulatory frameworks. Themes could include the transnational applicability of different land management approaches (such as land readjustment, transferrable plot ratio rights); a comparison between different planning regimes and governance structures; approaches to measurement and standards for urban density, floorspace for housing, and other land uses; types of green space in urban areas and improving provision; mechanisms for capturing land value created by urban development; comparative research on the scope and effectiveness of planning enforcement regimes; how to reduce corrupt practices in land governance. Article types may be original research or reviews of current research, whether local, national, or transnational.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
