Special Issue

Strategic Planning for Urban Sustainability (Second Edition)

Message from the Guest Editors

Usually, land for urbanization is readily and affordably available in locations where one is not supposed to build and quite scarce and extremely expensive where it barely exists. Excessive urbanization in suburban locations can lead to the potential decline of more centrally located neighborhoods. Anticipatory and integrated strategic land use and transportation planning mechanisms are needed to obviate opportunistic and speculative land markets. In many cities of the Global North, the iatrogenic nature of uncoordinated policy-market imbalances has resulted in sprawl, leap-frog development, spoiled countrysides, vehicle-dependence, long commutes, unfeasible mass transit, unhealthy environments for vulnerable populations, environmental externalities, and overall poor urban quality of life for everybody. This Special Issue of Land seeks review papers and articles dealing with these challenges from economic, environmental, social, normative, technological, historic, and cultural perspectives. Quantitative, qualitative, and mixedmethod studies will be considered.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
