

Special Issue

New Perspectives in the Management and Monitoring of Mountain Ecosystems

Message from the Guest Editors

Mountain areas are one of the most fragile ecosystems in the world, and any interference can lead to irreversible changes in the structure of mountain landscapes and their components. This Special Issue aims to present the research results on the influence of natural and anthropogenic factors on the functioning of mountain ecosystems in different regions of the world, in historical and contemporary aspects. This Special Issue will welcome manuscripts that link the following themes:

- Relationship between human activity and mountain ecosystems' functioning;
- Vegetation and soil diversity in mountain areas under human impact;
- The historical and modern importance of pastureland in mountain areas;
- The evidence of historical animal grazing and land cultivation recorded in the landscape;
- The role of historical maps in reconstructing past land use;
- Methods of monitoring the mountain ecosystems;
- Climate changes and mountain ecosystems.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
