

Special Issue

Conservation of Bio- and Geo-Diversity and Landscape Changes II

Message from the Guest Editors

The Rio Convention on Biological Diversity has established biodiversity as a key concept governing the development policies of most countries towards assuming responsibility for the environment. The convention has also recommended measures dealing with the conservation of biodiversity, as well as the measures needed to ensure that the future development is made in a way that does not affect the biodiversity. At the same time, as part of the “global changes”, land cover and use changes are a major threat to biodiversity. The Special Issue deals with the relation of the two, and with the factors able to affect it. We welcome pure and applied research, as well as comparative studies. Examples of possible topics include:

- Impact of LUCC on bio-, geo-, and eco-diversity: drivers and means of controlling or mitigating it;
- Impact of LUCC on the natural protected areas: drivers and means of controlling or mitigating it;
- Spatial planning tools for preventing LUCC within and around the natural protected areas at different spatial scales;
- Natural hazards and bio-, geo-, and eco-diversity: human influence on their relationship.

Guest Editors

Prof. Dr. Alexandru-Ionuț Petrișor

Dr. Adrian Ursu

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
