

Special Issue

Sustainable Development of Urban Spaces Based by the Principles of Green Urbanism

Message from the Guest Editors

Translating the principles of green urbanism into practice involves complex, interdisciplinary challenges that span the natural sciences, social sciences, and humanities, and demands innovative approaches across various domains, including methodologies, technologies, policies, and practical implementation. Contributions focusing on the inherent environmental, social, and economic dimensions of these challenges are highly encouraged. In this Special Issue, we place emphasis on, but do not limit our scope to, the following topics:

- Circular economy and resource efficiency in urban energy and material flows;
- Green energy and materials for the design of urban spaces, architecture, and landscapes;
- Sustainable urban water management and biodiversity conservation;
- The design, planning, and governance of blue-green infrastructure;
- Low-carbon urban transport systems and sustainable mobility;
- Strategies for climate-resilient and carbon-neutral urban development;
- Sustainable urban renewal methods, practice, and governance;
- Social sustainability, community well-being, and equitable access to urban spaces;
- Interdisciplinary case studies and novel assessment frameworks for Green Urbanism;

Guest Editors

Dr. Xiwei Shen

Dr. Rui Wang

Dr. Hong Wu

Dr. Xuechen Gui

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
