

Special Issue

Impact of Pollutants on Soil Health

Message from the Guest Editors

Soil health degradation has been one of the world's most pressing environmental problems over the past few decades, and it will worsen unless we take immediate action. Soil health deterioration is caused by natural and anthropogenic processes that alter the ecosystem's inherent physical, chemical, and biological properties. Drought, flooding, water pollution, extensive use of chemicals and fertilizers, disposal of non-biodegradable waste, deforestation, intensive agriculture, unsustainable land management practices, mining, industry, and urbanization are believed to be the most significant causes of soil health degradation. The purpose of this Special Issue is to examine soil degradation caused by pollutants and to present innovative methods and techniques that could either reverse the phenomenon or make it more manageable.

Guest Editors

Dr. Ioannis Zafeiriou

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
