

Special Issue

Cultural Heritage Preservation as a Basis for Sustainable Development and Transformation of Historic Urban Landscapes

Message from the Guest Editors

Cultural heritage and cultural landscapes are a popular topic of research. Often preservation and development is presented as two poles that need to be balanced. With this Special Issue we want to follow a contemporary approach that uses heritage (preservation) as the starting point and resource for sustainable development policies, strategies, projects, and results. Starting with a systemic understanding of heritage that includes objects, landscapes, subjects, processes, values, etc. and views heritage as a system and process, this Special Issue shall explore how heritage can contribute, stimulate, facilitate, and accompany urban development and also transformation projects and processes. The goal of this Special Issue is to collect papers (original research articles and review papers) to give insights about heritage preservation and transformation as a basis for the sustainable development and transformation of historic urban landscapes.

Guest Editors

Prof. Dr. Christer Gustafsson

Dr. Matthias Ripp

Dr. Manal Ginzarly

Dr. Zachary Mark Jones

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
