Comprehensive Transportation and Territorial Space Coordinated Planning

Message from the Guest Editors

Territorial space coordinated planning and comprehensive transportation are closely related concepts, and understanding the mechanisms governing their interactions and coordinated development has become an important focus of academic research. To advance research in this critical field and to promote deeper integration of academic study, industry practice, study, and policy, we are pleased to launch a Special Issue of the journal *Land*, entitled “Comprehensive Transportation and Territorial Space Coordinated Planning”.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
