

Special Issue

Sustainable Food Landscapes: Agricultural Practices and Consumer Awareness

Message from the Guest Editors

Sustainable food production should take advantage of current studies to promote sustainable development; however, a lack of education and a disconnect between actions and behaviour inhibits sustainable practices and devalues sustainable agriculture farming. Consumers need to learn how to approach sustainability holistically and understand the connection between their daily actions, climate change and soil degradation. This Special Issue will welcome manuscripts (original research articles and review papers) that link the following themes:

- Food system adapted to the prevention and control of land degradation.
- Food landscapes that valorize water and soil resources from the perspective of the SDGs.
- Making cultural landscapes and agricultural systems compatible.
- Agritourism, ecotourism and educational activities to link consumers and farmers.
- The role of urban farms, community and education gardens in food systems transitions.
- Circular economy as input to improve sustainability and regional development.
- Linkages between urban citizens and rural areas.

We look forward to receiving your original research articles and reviews.

Guest Editors

Dr. Dora I. R. Ferreira

Dr. Adélia de Jesus Nobre Nunes

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
