

Special Issue

Landscape Planning for Mass Tourism in Historical Cities

Message from the Guest Editors

Mass tourism is linked with the history of the tourism industry, and there are many tourist cities that decide to convert their historic center area into a tourist one. Additionally, mass tourism has negative impacts on destinations such as tourism gentrification and environmental, economic and socio-cultural impacts on society. This Special Issue emphasizes the importance of landscape planning for mass tourism in historical cities and outlines the urban policies involved in landscape planning. Hence, this issue wants to add new theoretical and practical implications which relate to the subject and the possible solutions that might appear regarding urban planning in some historical cities worldwide. The authors are encouraged to submit research papers that have tangential interest on the two concepts of landscape planning and historical tourism, revealing new insights in order to help the authorities to build new tourism plans or strategies for organizing the space. The results could have different implications for stakeholders in tourism and landscape planning and they might add new perspectives relating to the gentrification phenomenon in tourism.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
