

Special Issue

There Is No B Planet: Relevant Experiences and Case Studies on Future Challenges in Sustainable Urban Planning & Territorial Management

Message from the Guest Editors

Planning land uses that are compatible with the ecosystem services of the territory and managing them using public–private cooperation systems is a vast challenge for our global society. This field of research must help to guarantee the maintenance of natural resources, which are necessary for the social and economic activities of our global society. This Special Issue collects papers from the 2nd international Conference on Future Challenges in Sustainable Urban Planning & Territorial Management (<https://suptm2024.sciforum.net/>). We welcome contributions on the following topics:

- Imbalances in urban growth;
- New urban phenomena linked to sustainability;
- Studies linked to sustainable urban mobility;
- Land use planning and management to protect periurban landscapes;
- Environmental planning and anthropization phenomena in vulnerable areas;
- Risk analysis and diagnosis of urban flooding phenomena derived from land-use change;
- Spatial analysis of migration phenomena;
- Regional studies through spatial analysis and GIS tools.
- Green infrastructures and new innovative proposals towards sustainable development.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
