Special Issue

Land Use Dynamics, Socioeconomic Transformation, and Climate Change: Challenges and Opportunities for Sustainable Landscapes

Message from the Guest Editors

Climate change, driven by both natural and human activities, has intensified due to technological advancements and increasing resource demands. This has led to more frequent climate extremes such as droughts, floods, heatwaves, storms, hurricanes, and wildfires. Addressing these challenges requires collaboration among researchers, policymakers, and decision-makers to develop effective mitigation and adaptation strategies. Investigating the links between land use dynamics, socioeconomic transformation, and climate change is crucial for designing targeted solutions.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Department Sustainable Landscape Development, Institute for Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
