

## Special Issue

# Agritourism in Inland Areas: An Opportunity for the Development of Rural Areas

### Message from the Guest Editors

Agriculture and agrarian landscapes converge with tourism in a specific modality, agritourism. In this Special Issue, there is a need to analyze the current literature, but also the study of supply and demand, its impacts or the territories where it is developed, as well as the proposal of methodologies that approach the study of this type of tourism from different perspectives. These include economic, territorial, sociological, cultural, and environmental perspectives and the repercussions that agritourism can have on rural development in areas that are being affected by depopulation.

This Special Issue will welcome manuscripts that link the following themes:

- Agricultural vs. cultural landscapes;
- Agritourism and organic farming or quality brands;
- Agritourism, rural development, economic diversification, and depopulation;
- Linkages and networks between agriculture and tourism in low-density territories;
- The planning of agritourism activities;
- The sustainability of agritourism;
- Territorial analyses of agritourism activity.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
