

Special Issue

Time to Rethink Rural Landscape Planning for Achieving the Sustainable Development Goals (SDGs)

Message from the Guest Editors

With this Special Issue, we intend to collect contributions that help in the planning of territories by the objectives set (i.e., the SDGs), and which provide concrete solutions so that sustainable development becomes a reality. For this, we are especially interested in:

- Technical and scientific criteria for the location of constructions and infrastructures in territories;
- Technical and scientific criteria for the design of buildings and infrastructures in rural areas;
- Landscape assessment methodologies that take the SDGs into account;
- Analysis of transport and communication networks in rural areas;
- Extreme weather conditions in planning: fires and floods;
- Analysis of opportunities and threats for the sustainable development of rural areas;
- Protection of the rural landscape against indiscriminate resource exploitation;
- Technical and scientific criteria for the development of sustainable rural tourism.

Guest Editors

Dr. María Jesús Montero-Parejo

Dr. Jacinto Garrido Velarde

Dr. Lorenzo García Moruno

Dr. Julio Hernández Blanco

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
