Special Issue

Navigating the Balance: The Role of National Parks in Ecological Conservation and Socioeconomic Development

Message from the Guest Editors

The goal of this Special Issue is to explore the intricate balance between preserving natural environments and fostering socioeconomic welfare within and around national parks. Considering the complexity and diversity of National Parks, this issue covers various topics. We are looking for contributions that look into how to assess and improve National Park protection, both broadly and in detail. Topics include, but are not limited to, the following:

- The socioeconomic impacts of national parks on local communities:
- Strategies for balancing conservation efforts with regional economic development;
- The influence of political, economic, and cultural traditions on national park policies and practices;
- Predictive models and scenario simulations for sustainable development within national parks;
- Historical, current, and future perspectives on the role of national parks in societal and economic systems.

We encourage contributions in the form of original research articles, reviews, case studies, and perspective pieces that shed light on the multifaceted role of national parks in ecological and socioeconomic systems.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
