

Special Issue

Participatory Land Planning: Theory, Methods, and Case Studies

Message from the Guest Editors

In recent years, participation in land and urban planning processes has received growing interest in both academia and public administration. Different methods and instruments have been designed and implemented to channel participation in planning (action planning event, community planning forum, prioritising, etc.), although there is still some way to go. In this sense, there is debate about the role of participation in planning, its advantages and disadvantages, who should participate, the relationship between the actors, what methods to implement, etc. There are still questions to be resolved.

We hope that this Special Issue will contribute to improving the understanding of participation in territorial and urban planning and facilitate international exchange. This Special Issue will welcome manuscripts that link the following themes:

- Theory of land and urban planning;
- Land and urban policy;
- Collaborative planning;
- Strategic planning;
- Territorial governance;
- Actor networks.

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
