

Special Issue

Redefining Cities and Planning under the Twin Smart and Green Transition

Message from the Guest Editor

The Special Issue plans to give an overview of the most recent advances in the field of cities and planning, and identify emerging city patterns and models that allow mastering the transformation of cities driven by the twin digital and green transition as an opportunity for a radical change of city ecosystems, innovation leapfrogging, and system innovation. Potential topics include, but are not limited to:

- new structures in cities under the impact of the twin transition;
- urban modeling using big data and real-time data; smart-green planning models for the 21st-century cities;
- city readiness for climate change; mobility-as-a-service and re-organization of the mobility ecosystem;
- planning for smart campuses;
- planning for net zero cities and districts;
- planning for vision zero to eliminate severe accidents;
- positive energy cities and districts;
- cyber-physical networks in urban innovation hubs.

Guest Editor

Prof. Dr. Nicos Komninos

Urban and Regional Innovation Research (URENIO) Faculty of Engineering, Aristotle University of Thessaloniki, 54124 Thessaloniki, Greece

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
