

Special Issue

High-Altitude Grasslands: Biodiversity Conservation, Management, and Habitat Preference

Message from the Guest Editor

High-altitude grasslands host a plethora of rare or endemic species, with complex biogeographic histories and often deserving conservation actions, especially in light of the changing climate. Although high-altitude grasslands may be challenging to reach, and data collection can be demanding for their intrinsic nature, studies on these delicate environments must be conducted to pose the basis for their protection. I, therefore, encourage you to send your contributions to this Special Issue (including but not limited to):

- Substantial contributions to the biogeography of rare/endemic/threatened high-altitude grassland species;
- The role of high-altitude grasslands as glacial refugia, especially in terms of phylogeographic patterns;
- Climate and/or land use change impact on grassland species/communities;
- Positive or negative impact of human practices (e.g., agriculture, pasture) on high-altitude grassland species/communities at a landscape scale... ..

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
