

Special Issue

Topical Advisory Panel Member Solicited Papers Series: Land Use Changes in Rural Areas

Message from the Guest Editors

This Special Issue seeks to showcase innovative methodologies using land use change models for investigating and explaining land change dynamics in rural areas and to explore and identify how researchers in different disciplines can learn from one another to develop understanding of rural land use patterns and processes taking place in different geographical areas and the implications these changes may have locally and globally. It will emphasize multidisciplinary dialogue between researchers using land use change models in human and physical geography, hydrology, ecology, economics, agricultural sciences, alternative histories, sociology, and others. This Special Issue will welcome manuscripts that link the following themes:

- Land change dynamics and patterns in rural landscapes.
- Urban-rural interactions and conflicts.
- Rural land management and governance linked with land use changes.
- Land use processes and their driving factors.
- Direct and indirect consequences of land use changes in rural socioecological systems.
- Land use scenarios in rural landscapes.
- Land use modelling advances.

Guest Editors

Dr. Marta Gallardo

Dr. Julio Fernandez Portela

Dr. David Cocero

Dr. Lara Vilar

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
