# Special Issue

# New Insights into Land-Space Ecological Restoration (LSER) Policy for Sustainable Development Goals

## Message from the Guest Editors

The Special Issue aims to consolidate novel insights and seminal papers on the interconnections and contributions of land-space ecological restoration (LSER) policies and associated practices towards achieving one or more Sustainable Development Goals (SDGs). This encompasses exploring the theoretical frameworks of LSER in relation to the SDGs, innovative LSER approaches for achieving the SDGs, and empirical evidence and case studies on the impact of LSER on advancing the SDGs. These themes align seamlessly with the journal's scope, encompassing socialecological systems science, ecosystem services research and governance, land-space planning, sustainable development research, and trade-off analyses in natural resource management, among others. The SI welcomes manuscripts that link the following themes:

- Theoretical frameworks of LSER in relation to the SDGs.
- Advanced approaches and technologies for implementing LSER towards achieving the SDGs.
- Macroscopic view or national perspective on LSER for promoting the SDGs.
- Case studies examining the impacts of LSER on advancing progress towards one or more SDGs.

# About the Journal

### Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

#### Editor-in-Chief

#### Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
