

## Special Issue

# Resilient Land Systems in a Changing Climate

### Message from the Guest Editors

Land systems are vital for ecosystems, biodiversity, and human livelihoods but face growing challenges from climate change, including extreme weather, shifting land use, and ecosystem degradation. This Special Issue explores strategies to enhance land system resilience through interdisciplinary research. We welcome contributions on adaptive land-use planning, ecosystem restoration, climate-smart agriculture, socio-ecological resilience, and the role of technology and governance. By integrating research and case studies, this issue aims to provide actionable insights for policymakers, researchers, and practitioners.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
